Dr. Bruce Stein is the associate director for the National Wildlife Federation's (NWF) Wildlife Conservation and Global Warming National Advocacy Center in Washington, DC. Dr. Stein's work focuses on using scientific data and knowledge as a tool for better protecting our most threatened species and ecosystems. He currently co-leads the organization's Global Warming Safeguards team, which focuses on better understanding the vulnerabilities of our species, ecosystems, and communities to the impacts of climate change, and developing innovative policies and management strategies to address those impacts. He joined NWF in 2008 after beginning his career carrying out botanical explorations of the tropical rainforests of South America and later serving as a senior scientist for The Nature Conservancy and the chief scientist for [NatureServe](#).
